THE AVERAGING IN SYSTEMS OF ORDINARY DIFFERENTIAL EQUATIONS WITH RAPIDLY OSCILLATING SOLUTIONS. [1961] [37] p. 6 refs.
Order from OTS or SLA \$3.60 61-16454

Trans. of Akademiya Nauk SSSR. Izvestiya. Seriya Matematicheskaya, 1960, v. 24 [no. 5] p. 721-742.

DESCRIPTORS: *Differential equations, Complex variables, Numerical analysis.

A system of ordinary differential equations is discussed, where the derivatives of the "rapidly-oscillating" variables are included with a small parameter, ϵ . "Averaged" equations are introduced, which describe, approximately, the variation of the slowly varying variables. It is shown that, as $\epsilon \rightarrow 0$, these variables, computed from the initial system of differential equations, converge to the solution of the averaged system.
